

Sustainable Roofing

Designer Series Slate

Beaver Tail | Beveled Edge | Chisel Point

Environmentally friendly synthetic slate roofing tiles proudly made in the USA

Pioneers of sustainable roofing since 1993

Designer Series Slate

Many unique shapes and designs have been seen in slate roofing throughout history. Designer Series Slate tiles allow building owners the opportunity to continue that expression of individuality. EcoStar LLC, the leading manufacturer of premium synthetic steep-slope roofing products, offers three classic shapes as part of the Designer Series Slate collection. Made with the same formulas and offering the same benefits as Majestic Slate™ and Empire Slate™, Designer Series Slate offers unlimited creative possibilities.

Beaver Tail

The rounded look makes this classic slate tile perfect for designing unique roof patterns or creating a true carriage house appeal.

Beveled Edge

The look of scalloped edges in a hexagonal pattern makes beveled edge tiles a classic. This rare style can be intermixed with traditional slate tiles or used separately for historical applications.

Chisel Point

Chisel Point tiles form a beautiful diamond pattern on the roof, reminiscent of European roof designs.

Available Colors:

Majestic Slate: 11 standard colors

Empire Slate: 14 standard colors and a wide range of custom colors

Note: Sample pieces, photographs or color samples may not accurately represent the true color level or variations of color blends that will appear on the roof. Before installation, ten tiles or so should be laid out and reviewed for conformity to desired color level. If color levels are unsatisfactory, advise your dealer before proceeding with installation. Colors and specifications are subject to change without notice. EcoStar is not liable for color variations or shading. Tiles must be randomly blended for best results. Limited warranties carry terms and conditions.
