

EcoStar[™] LLC

Sustainable Beauty

Pioneers of sustainable roofing since 1993

Preserving the Future

Sustainability and Preservation

EcoStar LLC leads the composite steep-slope roofing industry with its premium synthetic slate and shake roofing tiles. EcoStar products are made to the highest of standards and are the environmentally responsible choice for contractors, specifiers, architects and property owners.

EcoStar tiles are manufactured with a material made of up to 80% recycled post-industrial rubber and plastic. Your purchase of EcoStar products assists in the diversion of millions of pounds of scrap rubber and plastic from landfills annually.

By using recycled materials, EcoStar tiles aid in the preservation of natural resources. No trees are used in the creation of Seneca Shake and Empire Shake and no stones are quarried for the manufacturing of Majestic Slate, Empire Slate, Majestic Niagara Slate and Empire Niagara Slate.

Durability

EcoStar products offer long-term strength and durability while providing superior protection from the most severe elements. Enjoy peace of mind with the available options that include a 50-year transferable warranty, Class A and Class C fire ratings, Class 4 impact resistance rating and 110 mph wind warranty.

*Warranties must be registered with EcoStar LLC to be valid. Visit www.ecostarllc.com for terms, conditions and limitations.

LEED® Certification

USGBC's Leadership in Energy and Environmental Design (LEED®) is the national standard for the development of high-performance green buildings. EcoStar tiles, through their sustainability, may contribute toward LEED® certification.

Energy-Saving Possibilities

Enjoy additional energy savings from our line of cool colors, available in Empire tiles. EcoStar offers three Energy Star® rated colors including Sea Salt, Drifting Dunes and Saratoga Sunset.

- The look of natural slate & shake
- Class A or C fire resistance
- Class 4 impact resistance
- Made from up to 80% recycled materials
- Wind resistance to 110 mph
- Vibrant, long lasting color

*EcoStar roofing tiles are
eco-friendly and proudly
made in the USA*

Sustainable Roofing for Your Lifestyle

What makes EcoStar roofing products eco-friendly? They meet the three criteria that define environmentally friendly, sustainable building products as they are: made of recycled material, can be recycled and offer an extended life cycle. As the leading manufacturer of premium steep-slope roofing products, EcoStar continues to provide the roofing industry with unique, sustainable products that offer exceptional longevity, durability and aesthetics.
