

**The 50-Year Limited Labor & Material Warranty is available ONLY through applicators who have been trained and are authorized as Gold Star Applicators.**

**The following are highlights of the 50-Year Limited Labor & Material Warranty, subject to the terms and limitations therein:**

The 50-Year Limited Labor & Material Warranty is non-prorated for the first 10 years of coverage. After the first 10 years, EcoStar™ will pay a percentage of the reasonable replacement costs as outlined within the warranty. This percentage is derived by dividing the number of months remaining in the warranty period by the number of months in the original warranty period.

The 50-Year Limited Labor & Material Warranty includes your responsibility for the workmanship and labor to install all the EcoStar products.

The 50-Year Limited Labor & Material Warranty includes coverage for any product blow offs caused by winds less than 90 mph for the first ten (10) years of the warranty.

**The following procedure must be followed for issuance of a warranty:**

- STEP 1:** Prior to the start of the project the EcoStar Gold Star Authorized Applicator must complete the **Pre-Project Survey Form**. All information on this form must be completed, including the addition of the roof drawing.
- STEP 2:** **The Pre-Project Survey Form must be returned to the EcoStar Technical Department.** After review and approval, the EcoStar Gold Star Authorized Applicator will be notified of the assigned EcoStar Project Number. Any project that is started before the Pre-Project Survey Form has been approved by the EcoStar Technical Department may not qualify for the EcoStar Limited Labor & Material Warranty.
- STEP 3:** Upon completion of the project it is the responsibility of the EcoStar Gold Star Authorized Applicator to send the Notice of Completion to request a final inspection of the project.
- STEP 4:** A final EcoStar inspection shall be made by an EcoStar Field Service Representative. The EcoStar Technical Department will inform the applicator if there are any deficiencies that will require repair. After remediation, a re-inspection may be scheduled.
- STEP 5:** Upon receipt of the final inspection report, if approved, the EcoStar Technical Department will issue a 50-Year Limited Labor & Material Warranty.
