Protection of Your Most Sacred Assets

Your religious facility is a sacred place. It is the central point of your community and a place for people to come together in times of celebration. The beauty and uniqueness of your building should reflect that of the spirit within. At EcoStar, we know the lengths you will go to protect your facility and we offer a product that will help you do just that.

An EcoStar roof provides your sacred facility with the beauty you want and the protection you need. EcoStar's composite roof products offer the look of natural slate and shake roofing, while providing the durability of manufactured materials. These premium products are made to the highest of standards to ensure your happiness with both the quality and aesthetics of your roof.

Available in multiple profiles and unlimited colors, EcoStar roofs are truly customizable and can replicate original roof designs when desired.

The Beauty of Natural Slate & Shake

EcoStar slate is an affordable and environmentally friendly alternative to natural slate. It is available in multiple sizes and profiles, including Niagara Slate, our largest and thickest slate.

EcoStar shake provides the rich, traditional look of natural wood, with the added benefits of durability and sustainability. Empire Shake can be installed in the Aspen Blend style for added depth and texture.

Unlimited Color Options

EcoStar's standard color palette provides unlimited potential to enhance the beauty of your religious facility. Choose from “wide-range” blends that provide the subtle elegance of one-color multi shade variation or select completely customized multicolor mixes that create a striking and unique style.

Design Flexibility

Traditional and Designer Series tiles can be combined to enhance the architectural detail of the entire building.

Many unique shapes and designs have been seen in slate roofing throughout history and the Designer Series Slate tiles allow you the opportunity to continue that expression of individuality.
