

Random-Width Blend

Pioneers of sustainable roofing since 1993

Relish the Beauty of Slate

The Most Realistic Slate Blend

EcoStar LLC is the premier steep slope roofing tile on the market. EcoStar's synthetic slate and shake products are made to the highest of standards and are the environmentally responsible choice for contractors, specifiers, architects and property owners. EcoStar recently introduced the Random-Width Blend, offering the most realistic slate appearance.

The Random-Width Blend is an even blend of 6", 9" and 12" synthetic slate tiles, which provides unparalleled beauty. An even number of each size tile is included in every bundle for ease of installation on-site. These synthetic slate tiles combine the strength and durability of EcoStar's traditional product lines with the added benefit of multiple widths.

The Random-Width Blend is available in both the Majestic and Empire product lines, including Empire's unlimited color options. With straight and staggered installation options, this blend provides the look you desire and the protection you need.

Durability

EcoStar products offer long-term strength and durability while providing superior protection from the most severe elements. Enjoy peace of mind with available options that include a 50-year transferable warranty, Class A and Class C fire ratings, Class 4 impact resistance rating, and a 110 mph wind warranty.

*Warranties must be registered with EcoStar LLC to be valid. Visit www.ecostarllc.com for terms, conditions and limitations.

Color to the Core

Unlike some synthetic products that only feature coloring in the top layers, you get color to the core with EcoStar tiles. Color to the core means the standard and custom color options available with EcoStar Slate are engineered throughout the entire tile, not simply on the top, to provide a vibrant and long-lasting look for your home.

Endless Customization

The Random-Width Blend is available in both the Majestic and Empire product lines. Majestic Slate is made from 80% recycled materials and is available in 11 standard colors. Empire Slate is made from 25% recycled materials. It is available in 14 standard colors, unlimited custom colors, and marbled blends that incorporate multiple colors within each tile. With the option of either straight or staggered installation, the Random-Width Blend allows you the opportunity to completely customize your roof.
