# The most realistic Slate Blend

Majestic Niagara Slate Random-Width Blend in Black

## Sustainable Roofing for Your Lifestyle

EcoStar LLC is the premier steep slope roofing tile on the market. EcoStar's synthetic slate and shake products are made to the highest of standards and are the environmentally responsible choice for contractors, specifiers, architects and property owners. Random-Width Blends are available in both the Traditional and Niagara product lines.

Traditional Random-Width Blend includes 6", 9" and 12" Majestic Slate or Empire Slate tiles, which are solid profiles. Niagara Random-Width Blend includes 10", 12" and 14" Majestic Niagara Slate or Empire Niagara Slate tiles, which are cavity-back profiles. An even number of each size tile is included in every bundle for ease of installation on-site. With straight and staggered installation options, these blends provide the look you desire and the protection you need.

## Color to the Core

Unlike some synthetic products which only feature coloring in the top layers, you get color to the core with EcoStar roof tiles. Color to the core means the standard and custom color options available with the Random-Width Blends are engineered throughout the entire tile, not simply on the top, to provide a vibrant and long-lasting look for your home.

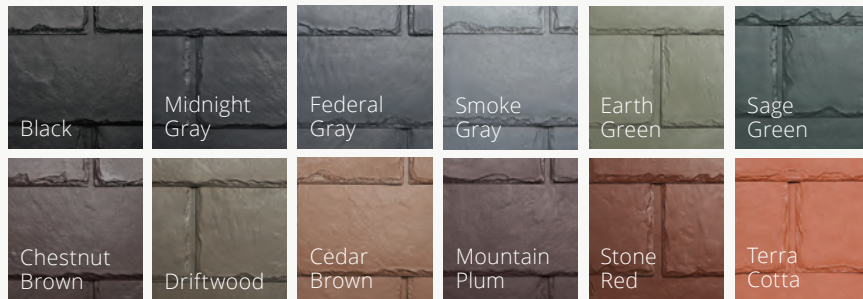

## Durability

An EcoStar roof system provides your home with superior protection from the harshest elements while adding a stunning profile and authentic wood shake look. Manufactured with up to 80% upcycled polymeric materials, EcoStar tiles offer long-term strength and durability. EcoStar roofs are freeze/thaw resistant, Class A or C fire rated, Class 4 impact resistant, offer wind resistance to 110 mph (ASTM D3161), and are available with a 50-year transferable warranty. See [www.ecostarllc.com](http://www.ecostarllc.com) for available warranties.

## Endless Customization

The Random-Width Blends are available in both the Majestic and Empire product lines. Majestic products are made from up to 80% upcycled materials and are available in 12 standard colors. Empire products are made from up to 25% upcycled materials. They are available in 14 standard colors, unlimited custom colors, and marbled blends that incorporate multiple colors within each tile. With the option of either straight or staggered installation, the Random-Width Blends allows you the opportunity to completely customize your roof.

## Majestic Standard Colors

Color samples may not accurately represent the true color level or variations of color blends that will appear on the roof. Colors and specifications subject to change without notice. EcoStar is not liable for color variations or shading.

## Empire Standard Colors

Enjoy additional energy savings from our line of Cool Colors, available in all Empire colors (excludes Bedford Black, Tioga Terra Cotta and Plymouth Patina).
