Majestic Niagara Slate

Majestic Niagara Slate is a natural-looking, 5/8" thick, synthetic slate roofing tile produced in 10", 12" and 14" widths and available individually or as a Random-Width Blend. Each Majestic Niagara Slate 14" tile covers one square foot of roof deck at the 10" exposure (100 tile/square), maintaining a 2" headlap throughout. An additional 9" exposure option allows for the creation of unique looks using staggered, offset or random-width installations.

These synthetic slate tiles are manufactured from 80% post-industrial recycled materials and provide superior protection from the most extreme elements such as rain, wind, hail, snow, fire, extreme temperature change and the sun's UV rays. Little-to-no maintenance combined with a 50-year warranty means a trouble-free roofing solution with lasting performance.

Available in 12 standard colors, 10 factory blends and an array of custom color options, Majestic Niagara Slate provides the opportunity to showcase the beauty of natural slate at a fraction of the cost.

Majestic Niagara Slate Standard Colors

Color samples may not accurately represent the true color level or variations of color blends that will appear on the roof. Colors and specifications are subject to change without notice. EcoStar is not liable for color variations or shading.

Advantages

- The look of real slate without extensive maintenance
- Weighs significantly less than natural slate
- Easy application keeps installation costs down
- Factory pre-blended for color & width
- Significant property insurance discounts may be available when upgrading or building a roof to protect against the elements

Architectural Flexibility

- Available in 12 standard colors and 10 factory blends
- Staggered, offset and random width installation techniques enhance roof texture and depth

Strength & Durability

- Provides superior durability and protection from extreme weather conditions that include fire, wind, hail and driving rain
- 22" length provides up to 4" of headlap protection against wind-driven rain and ponding snow melt (at 9" reveal)
- Significant life cycle savings

Environmental Sustainability

- Manufactured with post-industrial recycled rubber and plastics (not tires)

Technical Information

- UL listed Class C fire resistance (UL 790)
- Category highest Wind Speed resistance
- UL Class 4 impact resistance (UL 2218)
- Prolonged UV Exposure (ASTM G155)
- UL Evaluation Report, AC07-UL ER 18920-02
- Texas Dept. of Insurance Evaluation (RC-135)
- May contribute to LEED® points
- Manufactured in strict adherence to ISO 9001:2015 Quality Management

Warranty Options

- 50-Year Limited Material Warranty available
- 50-Year Gold Star Labor & Material Warranty available
